Experience

Freelance Work

- I have undertaken various freelance projects, where I have honed my skills in web development, user experience design, and front-end technologies.

ALUMISR Company   **July 2023 – August 2023**

ERP Intern   *Cairo, Wadi Houf*

- SAP Business One: Modules covered: Purchasing, Sales, Banking, Warehouses, BP Master Data (Items Master Data).
- SQL Server Queries: Learned to write and optimize SQL queries for various data retrieval and manipulation tasks.
- Crystal Reports: Gained experience in creating numerous and diverse reports.
- IT Fundamentals: Acquired foundational knowledge in various IT concepts and practices.

Training at NTI   **July 2024 – August 2024**

Web Design   *Cairo, Cairo University*

- Participated in a comprehensive training program at the National Telecommunications Institute (NTI) under the Ministry of Communications and Information Technology.
- The training focused on web design, covering essential technologies such as HTML5, CSS, JavaScript, and Bootstrap.
- Through this program, I gained hands-on experience in creating responsive websites, enhancing both my technical skills and understanding of modern web development practices.

ISEKAI Code Company   **October 2024 – present 2024**

Front-End Developer (React.js)   *Cairo, Maadi*

- Gained hands-on experience working on large, real-world projects, enhancing practical skills in React.js.
- Contributed to various complex projects, collaborating with a professional development team and refining front-end development expertise.
- Strengthened skills in creating interactive, user-centered applications with a focus on performance and scalability.

Projects

Arabic mastery | *React.js*   **August 2024**

- Developed and designed a comprehensive web application named Arabic Mastery, aimed at providing online courses for learning the Arabic language, Tajweed, and Islamic Studies. The platform offers an interactive and user-friendly interface, enabling students to engage in structured lessons, exercises, and assessments.
- Website: arabic-mastery.elda7e7.com

Housing APP | *React.js, Next.js*   **September 2024**

- A real-world project developed to help university students find suitable housing easily.
- Built a website that allows property owners to list their properties, providing detailed information for prospective student tenants.

- The platform is user-friendly and allows seamless property posting and search functionalities.
- Website: <u>sakkny.elda7e7.com</u>

ISEKAI Clinic | *Front-end, React.js*   **October 2024**

- Contributed as a front-end developer to build a comprehensive ERP system named ISEKAI Clinic for clinics and medical centers.
- Designed to streamline clinic operations, the system enables patient bookings, manages patient history with doctors, and organizes clinic inventory.
- Features include patient records, medical history, appointment scheduling for each clinic, and inventory tracking, enhancing the efficiency of medical centers.
